Digitas North America

Re: Analyst, Data and Analysis

Dear Hiring Team,

I spent my first four months in the Management Trainee Program at Kraft Heinz as the only Marketing Innovation Analyst in Canada on a team of Brand Managers and Sr. Brand Managers and I was tasked with developing a flavor innovation strategy for a \$150M brand in Canada. I showed up every day curious and eager to learn about the business and how 33% of consumers craved more unique flavors in their instant pasta and noodle meals. Ultimately, I built out my flavor strategy to address this category whitespace and drive more value for consumers, which included the creation of a novel product rotational model that would contribute \$1.7M in annual savings for the brand.

It is this type of experience that has made my time at Kraft Heinz so enjoyable and impactful to my professional growth and development; however, it is also what has helped me realize what I enjoy most in work and what I'm now seeking at Digitas as an Analyst, Data and Analysis – working with a team to bring data to life for clients to creatively solving problems they face. Reflecting on my career goals, I once summarized in a university assignment where I was asked to write my future obituary, “(he) realize(d) what really mattered in life to him: making an impact, even if it's just one moment created for one person – is worth a lifetime, and is itself a life well-lived.” And I see this sentiment at the core of what Digitas does and what makes the unicorns at Digitas who they are. Digitas is a leader in marketing creative innovation, bringing imagination to life for consumers and delivering networked experiences that draw people in and earn their attention. I want to be part of the team of unicorns continuing to shape the future of creativity and building memories for people through evolving magical experiences. I am excited to bring my blend of creativity and analytical skills, my initiative, and my eagerness to challenge myself and others to get better together to Digitas to support innovations with people at the center, ultimately bringing products to users that make their lives better and easier.

A summary of my qualifications that match your needs include:

- **Passion for Digital Marketing:** I grew the active user base of Ourmealplan 10x, leveraging past active user data and implementing improved SEO tools and a revamped marketing strategy. As Marketing Director for FreshSight Queen's Consulting, I achieved 500+ unique visitors and 1,800+ views within 1 month of new website launch and grew Instagram profile activity 74% and reach by 42% per post as part of a refreshed digital marketing and content strategy.
- **Eagerness to Learn:** At Kraft Heinz, I learned from business and technical leaders to understand previous roadblocks to leveraging rotational product models to avoid product listing fees and deliver innovations to customers faster and more frequently. I assessed these challenges and developed and successfully aligned the President of Canada and North America Coffee, VP of Canada Sales, and VP of Canada Marketing to a first-to-company model to avoid listing fees and deliver over \$1.7M in annually recurring cost savings
- **Familiarity with Data Analysis Tools:** I'm currently building a pricing and promotion model in Excel to monitor pricing and promotion strategy execution for sales and marketing teams and forecast future performance. With this model, I'm analyzing the data to identify opportunities for executional enhancements and collaborating with cross-functional teams to deep-dive into opportunity areas and developing a strategy to ensure annual pricing and promotion execution KPI targets are met. I also took initiative to take courses in SQL and Tableau to enhance my analytical skills.
- **Comfortable in a Fast-paced Environment:** As a Marketing Innovation Analyst, I successfully presented to the President of Canada and North America Coffee, the VP of Canada Sales, and VP of Canada Marketing, aligning them to a 3+ year flavor innovation strategy I developed for a \$150M+ Canadian brand on a 1.5 month accelerated timeline.

I look forward to hearing back from you and learning more about this ideal opportunity and how I can be an asset to Digitas. Thank you again for your time and consideration.

Sincerely,

Benjamin Chubbs
